Biotin Anti-Mouse Ly-6G Antibody

Catalog Number:	200703, 200704
Size:	50 μg, 500 μg
Target Name:	Ly-6G, Lymphocyte antigen 6 complex, locus G
Regulatory Status:	RUO

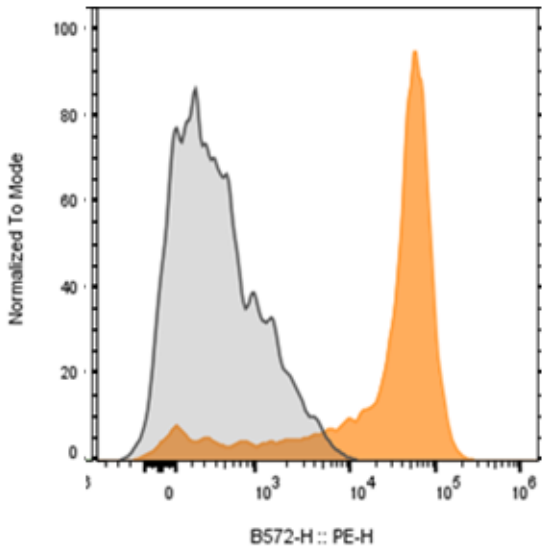

PRODUCT DETAILS

Clone:	1A8
Application:	Flow Cytometry
Reactivity:	Mouse
Format:	Biotin
Isotype:	Rat IgG2a
Antibody Type:	Monoclonal
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA
Protein Concentration:	0.2 mg/mL
Storage&Handling:	The antibody solution should be stored between 2°C and 8°C
Recommended Usage:	For flow cytometric staining, it is recommended to use less than 0.25 µg of this reagent per 0.5-1.0 million cells in a 100 µL volume. Optimal reagent performance should be determined by titration for each specific application.
Isotype Control:	300206

BACKGROUND INFORMATION

Lymphocyte antigen 6 complex, locus G (Ly-6G), is a 21-25 kDa glycosylphosphatidylinositol (GPI)-anchored surface protein. In mice, it is expressed predominantly on peripheral granulocytes, especially neutrophils, and on the majority of myeloid cells in the bone marrow. Ly-6G is transiently detected on developing monocytes but is stably and highly expressed on mature neutrophils. It plays important roles in neutrophil infiltration, recruitment, and migration, and associates with β2 integrins CD11a and CD11b to regulate their expression and function. The natural ligand for Ly-6G remains unknown, and it is widely used as a specific marker for murine neutrophils in immunological studies.

PRODUCT DATA

Mouse bone marrow cells stained with either Biotin Anti-Mouse Ly-6G clone 1A8 (Orange histogram) or an isotype control (gray histogram), followed by SA-PE.
