Biotin Anti-Human CD45RA Antibody

Catalog Number:	109403, 109404
Size:	25 ug, 100 ug
Target Name:	CD45RA, GP180, LY5, LCA, PTPRC
Regulatory Status:	RUO

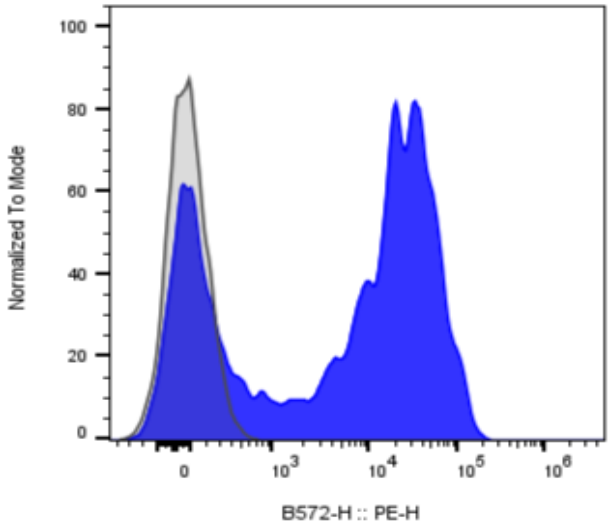

PRODUCT DETAILS

Clone:	HI100
Application:	Flow Cytometry
Reactivity:	Human
Format:	Biotin
Isotype:	Mouse IgG2b
Antibody Type:	Monoclonal
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA
Protein Concentration:	0.2 mg/mL
Storage and Handling:	The antibody solution should be stored undiluted between 2°C and 8°C, and protected from prolonged exposure to light. Do not freeze.
Recommended Usage:	For flow cytometric staining, it is recommended to use less than 0.05 µg of this reagent per 0.5-1.0 million cells in a 100 µL volume. Optimal reagent performance should be determined by titration for each specific application. For detection, use a secondary reagent with this product.
Isotype Control:	301619
RRID:	AB_3738902

BACKGROUND INFORMATION

CD45RA is a 205–220 kDa isoform of the CD45 tyrosine phosphatase, expressed on naïve/resting T cells, medullary thymocytes, B cells, and monocytes. It is found on ~40–50% of peripheral $CD4^+$ T cells, ~50% of $CD8^+$ T cells, and subsets of B cells and monocytes. CD45RA enhances TCR and BCR signaling and associates with molecules like LPAP, CD1–CD4, and galectin-1. Its expression is regulated by cytokines and can be present on some activated T cells. CD45RA-specific antibodies (e.g., HI100) are widely used to identify naïve T cells and study $CD4^+$ suppressor/inducer subsets.

PRODUCT DATA

Human peripheral blood lymphocytes stained with biotinylated Anti-Human CD45RA clone HI100 (blue histogram) or an isotype control (gray histogram), followed by SA-PE.
